Disability Benefits Management

Cleaner Claims Adjudication Better Quality of Life

Individuals with disabilities want to live as independently as they can. Getting benefit payments into their hands is the single best way that benefits programs and entitlement programs can help make the lives of deserving claimants less challenging.

AUTOMATE ALL ASPECTS OF DISABILITY CASE MANAGEMENT

Most disability benefits and entitlement program administrators grapple with unmanageable backlogs and wait times. Staff must do everything they can to reduce the volume of re-opened, re-filed, and reconsidered cases. Automating the case management process helps ensure that cases are adjudicated correctly the first time.

For more than 30 years, the comprehensive Disability Benefits Management application has been used by benefits programs and entitlement programs nationwide to manage millions of Social Security and other disability claims annually. It tracks cases from receipt through adjudication to disposition, ensuring that claims are processed quickly and cleanly. Authorized users can view all recorded activity. The end result? Beneficiaries receive their disability claim checks sooner.
